

### COMMAND SYSTEM

Heavy Industry

#### Description

P: Power supply

Operators in a factory are working next to heavy machinery, wearing thick gloves. During the process they need to call the control room. A heavy duty push button is mounted next to the BC735 unit. The operator will press it with his elbow to make a call. All calls from the operators are queued to the control room station and will be answered one by one. The loudspeakers are also operating as a microphone. All call is used for general information from station no. 10.
